

Irtiza Babar

Full Stack Web Developer

I'm a FullStack Developer experienced in both front- & back-end web development. I specialize in creating user-friendly designs that are optimized for SEO and accessibility with close attention to detail, providing a friendly experience for the user. I not only design and develop websites but also regularly test them to maintain their performance and fix any issues that arise. I also prioritize clean and organized code to make sure that it's easy to read and maintain.

EXPERIENCE

Digitano LLC, Full Stack Developer

JAN 2024 - PRESENT

- Led a complete Refactoring of a legacy laravel codebase to improve performance, readability, and maintainability.
- Collaborated with Designers and developers to create high-quality responsive websites.
- Created Admin Dashboard for managing site.
- Constantly check for application responsiveness and eliminate bugs. As well as using linters/formatters to keep code manageable.

JB, Full Stack Developer

FEB 2023 - NOV 2023

- Created designs and layouts for applications and web pages.
- Debug and fix existing software bugs to improve user experience & performance.

JB, Frontend Web Designer (Internship)

OCT 2022 - FEB 2023

During my internship, I gained hands-on experience in frontend development, converting design concepts into responsive, user-friendly web pages. I focused on optimizing website performance, ensuring cross-browser compatibility, and following UI/UX best practices. The internship provided me with skills in creating user-friendly and efficient websites.
